

# National Mock Exams 2024

POWERED BY ExamSimulator

# AQA A-level PE - Paper 1

# Please read before distributing to students.

#### Purpose of this document

The questions contained within this document and the associated mark scheme are based on the data analysis performed by The EverLearner Ltd and published within the 2024 infographics. Please, note the following:

- We believe this paper has a very strong association with the actual external exam in 2024 in relation to command terms, skills, A0 distribution, extended writing requirements and topics.
- However, this is categorically NOT a predicted paper. No-one can accurately predict an exam paper and we make no claim to this end.
- It is vital that you only use this document internally in your school/college. Publishing the document online or sharing it in any other way is strictly prohibited, as this will undermine the potentially educational experiences of students in other schools/colleges.
- Finally, please check the publication dates of the mark scheme and model answers for this paper as well as the associated revision sessions in April/May.

#### This paper contains:

- Questions in the format of AQA A-level PE Paper 1
- Multiple-choice questions
- Short-answer questions
- Extended writing

#### How should schools use these papers?

This paper has been constructed specifically for use as a mock exam but can be used less formally as a practice paper or model paper. The content and skills of the paper will be developed within the free-to-air revision sessions offered by James Simms in April/May 2024.

Mark schemes and model answers will be published on the following dates:

- Mark scheme: Early March
- Model answers: April
- Revision: 30th of April, 15:00-16:30

All questions are available on ExamSimulator, where they can be practised multiple times in both online and printable format. ExamSimulator is a premium resource available via TheEverLearner.com and provides immediate diagnostics of student writing performance after every exam answer.

Title	AQA A-level PE Paper 1 - National Mock Exam 2024

- This paper is marked out of 105 marks.
- You have 120 minutes (plus additional time for those who have Exam Access Arrangements).
- Answer all questions.
- A calculator is permitted for this exam.
- This paper contains three 8-mark and three 15-mark questions.
- Good luck.

Total marks	105		
-------------	-----	--	--

# **SECTION A: Applied Anatomy and Physiology**

<b>1.</b> Which of the following is condividual? (HR = Heart Rate,	orrect for the cardiac output of a <b>trained</b> SV = Stroke Volume)
	Increased SV and increased resting HR
	Decreased SV and Increased resting HR
	Decreased SV and Decreased resting HR
	Increased SV and decreased resting HR
	Marks: [1]
<b>2.</b> Only one of the following of Starling's law of the heart. W	cardiovascular exercise responses relates to
•	cardiovascular exercise responses relates to
•	cardiovascular exercise responses relates to hich one?  Increased venous return leads
•	cardiovascular exercise responses relates to hich one?  Increased venous return leads to increased stroke volume.  Increased venous return leads
•	cardiovascular exercise responses relates to hich one?  Increased venous return leads to increased stroke volume.  Increased venous return leads to a smaller diastolic filling.  Decreased venous return leads
•	eardiovascular exercise responses relates to hich one?  Increased venous return leads to increased stroke volume.  Increased venous return leads to a smaller diastolic filling.  Decreased venous return leads to a decreased stroke volume.  Decreased venous return leads
•	eardiovascular exercise responses relates to hich one?  Increased venous return leads to increased stroke volume.  Increased venous return leads to a smaller diastolic filling.  Decreased venous return leads to a decreased stroke volume.  Decreased venous return leads

3. Describe the pro		of meas	uring re	spirator	y excha	nge ratio	(RER) of
							Marks: [3]
<b>4.</b> The image show Complete the table 1 <b>to</b> 2.					lete mo	ves from	position
		Position 1		Position	12		
	Joint	Type of joint	Antagonist	Plane of movement	Axis of rotation		
	Ankle	А	В	С	D		
A:							
B:							
C:							
D.							

**5.** Analyse the functional characteristics of type IIx muscles fibres and their importance to a football player.
