Practical examples (A02)

Being able to make A02 applications to movement and performance examples is a critical feature of success in this paper. 35 marks come from A02 on average and you need to be able to make good quality examples to achieve these marks.

We recommend the **EIO** method. This means that you:

1. Give your **Example**.
2. State the **Impact** of the concept.
3. State the **Outcome** that it produces.

What **not** to do...

A sprinter would use protein when they do a weights session.

What to do...

A sprinter typically consumes 30g of protein after each weight session to cause muscular adaptations such as muscular hypertrophy and be able to lift heavier and longer in the next session.

According to Steiner's model, team games like football can experience faulty processes.
