Practical examples (A02)

Being able to make A02 applications to movement and performance examples is a critical feature of success in this paper. 26 marks come from A02 on average and you need to be able to make good quality examples to achieve these marks.

We recommend the **EIQ** method. This means that you:

1. Give your **Example**.
2. State the **Impact** of the concept.
3. State the **Outcome** that it produces.

What **not** to do...

Passing in football is an open skill.

What to do...

Passing in football is an open skill due to the environment around the player such as the position of teammates and opponents **always being unique**. The impact of this is the player must **make a pass at a specific angle, height and pace to suit that situation**.

An example of when manual guidance would be used is **when a table tennis coach moves a player**.
