Content preparation

- | | | |
|---|---|--|
| <input type="checkbox"/> I have completed the National Mock Exam paper and have received my diagnostic. | <input type="radio"/> Responding to injuries | <input type="radio"/> Blood redistribution |
| <input type="checkbox"/> I have OVER-LEARNT all of the most examined topics. | <input type="radio"/> Projectile motion | <input type="radio"/> Angular motion |
| <input type="checkbox"/> I have learnt all other specification content in preparation for lower-tariff questions. | <input type="radio"/> Analysis of movement | <input type="radio"/> Newton's laws |
| | <input type="radio"/> Recovery process and EPOC | <input type="radio"/> Energy continuum |
| | <input type="radio"/> Mechanics of breathing | <input type="radio"/> Ergogenic aids |
| | <input type="radio"/> Linear motion | |

Skills preparation

- ☐ I am fully aware of the most common command words in the OCR A-Level Paper 1 exam.
- ☐ I have OVER-PRACTISED 'Explain', 'Describe'/'Outline' and 'Evaluate' through the National Mock Exam, ExamSimulator and past-paper questions.

'Explain'
skill language

'Describe'/'Outline'
skill language

'Evaluate'
skill language

- ☐ I am fully aware that 20-mark questions accumulate the most marks in the OCR A-Level Paper 1 exam.
- ☐ I have OVER-PRACTISED 20-mark questions for the OCR A-Level Paper 1 exam from both ExamSimulator and the exam board.
- ☐ I know the required format of the extended-writing pieces for the OCR A-Level Paper 1 exam.
- ☐ I have practised all National Mock Exam, ExamSimulator and past paper examples of extended-writing.

Practical examples (A02)

Being able to make A02 applications to movement and performance examples is a critical feature of success in this paper. 36 marks come from A02 on average and you need to be able to make good quality examples to achieve these marks.

We recommend the **EIO** method. This means that you:

1. Give your **Example**.
2. State the **Impact** of the concept.
3. State the **Outcome** that it produces.

What **not** to do...

A sprinter would use protein when they do a weights session.

An example of an aerobic athlete is a marathon runner.

What to do...

A sprinter typically consumes 30g of protein after each weight session to cause muscular adaptations such as muscular hypertrophy and be able to lift heavier and longer in the next session.

Write your example here.
